11/9/70

Dear Mary (Sylvia, Gary, Paul, Howard, Dick),

My wonderful enemies havebeen helpful again. They've filed a supplement to their response to my spectro suit test, aside from b ing the farthurest-~~xxxxxx~~ out thing yet is, I believe, both perjurious and fraudulent. I have made a copy for you in the hope you can copy it for any who would like it and then, please, as soon as you can, return it tome so I can have a press copy. Ditto for the extra copy of Kleindienst's rejection of two or my requests, which I've already appealed. The very rough memo on the supplement you can keep. I fear it will not be easy to copy or to read for that matter, for the day is long and the carbon pale.

Bud is in California until Wednesday. I'll deliver this to his office tomorrow. I hope we get together before the hearing Monday, so I can prepare him on other than the law, for while this is a hearing on the law, there is no seperating fact and relevance to fact.

All the readings I get is that they are running out of walls to climb. Such a fraud as this is confirmatory. I've got to nav them where it hurt and they have to be desperate for this kind of stuff to be thrown in the fan. Only a corrupt judge can accept this. It is, as all of you will know, 100% irrelevant by a witness who I believe is 100% incompetent to be a witness, in itself so very strange with all these who are competent, meaning proper in the sense used, qualified.

I am hopeful Bud wil come to understand the potential of what he has been ignoring and will do what he should have been doing for so long. The possibilities are now very good. His partner is in accord with my thinking and approach and believes I should file all the suits I can. That is true, but how can I, with no help. Even the relatively simple initial costs are great from me, and when we think of getting to the point of paying witness expenses and filing or defending appeals....

Everyone is agreed that after all this time and effort, I have worked it to where the law is all my way. Time was I'd have considered that enough.

I will try. I will do what I can. I think I should win these cases. I do hope for valuable by-products. And I think they may change the climate some and should help restore credibility that now many of the articulate are and have been devoting themselves to destroying-and have destroyed.

I plan to add the two rejections to the partly drafted, mostly partly edited but entirely drafted, Ferrie complaint. They are both relevant. I'll await consultation with Bud before final decision, but Jim and Bill agree.

Best,
